

Mahon Point Shopping Centre

Project: Kiddy Entertainment and Education Kiosks

Location: Cork, Ireland

Brief: To install two stations into the designated kids area so as to provide young children with access to a small number of pre approved web sites showing appropriate age specific content. The units needed to suit the surroundings, be attractive and inviting and most importantly be safe and secure and acceptable to parents.

Our Solution

ICE Tech chose a palette to vivid colours and robust materials whilst also ensuring that the design did not present any health and safety risks whatsoever and was accessible to small kids in terms of height and reach. In addition to using our software to limit access to only a select number of pre approved sites we also included a secondary layer of content filtering that would guarantee even in the event of a pre approved site displaying otherwise unsuitable material that this would not be displayed under any circumstances.

Hardware

- 2 x 17.1" Kiddy Kiosks

Software
