

Mahon Point Shopping Centre

Project: Pay Per Use Kiosks

Location: Cork, Ireland

Brief: To provide the client with an extremely reliable service that would enable visitors to the Mall to access internet and e-mail services as well as to allow them to make VOIP calls and play the most advanced online Gaming available in the marketplace today. The systems were also required to display advertisements and events news whilst in idle mode.

Our Solution

ICE Tech conducted an on site audit and as a result were able to advise the client on the power and data requirements as well as enabling our designers to custom design the furnishing and branding required to suit perfectly this particular venue. In addition to our standard installation items we also provided the customer with full online gaming and also an online PIN system that allows them to offer special pricing to staff and to sell usage vouchers at discounted prices. ICE Tech also supplied information and kiddy entertainment kiosks as well as a public Wifi access service.
